

We take care of the daily hassle of your return-flow.

Then you can focus on optimising your forward flow.

CC Collection Service

We take care of your return-flow

No worries about returning your empty RTIs*

With CC Collection Service, you can leave the daily hassle of the return flow to us. When your products have reached their end destination, we take the responsibility of collecting your empty RTIs, e.g. at your customers, transporting them to the nearest CC Depot, and registering them on your balance. From there we can transfer them to the CC depot where you need them most via CC Transfer Service. Then you can focus on your core business instead of return-flow administration.

Fast collection means better RTI utilization

To keep the collection service fee at the lowest possible level, we will work with the local transport companies that are most competitive, when it comes to rates and collection frequency. We want to ensure that your empty RTIs are collected soonest possible, so they can re-enter the CC Pool System faster, and your need for additional RTIs will decrease due to a higher rotation rate.

Select the services, you need

You can choose the service level that meets your needs the best:

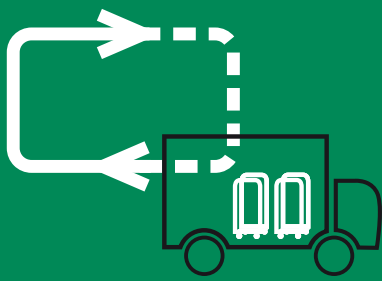

- Collection of empty RTIs from delivery location (e.g. sales outlet).
- Delivery to cleaning and (or) sorting, and (or) back to a preferred location.

It's all up to you.

* RTI = Returnable Transport Item

Making your products move

CC Collection Service

We take care of your return-flow

What you get with this service:

- 1 With CC Collection Service we take care of your return flow.** When your products have reached their end destination, we collect your empty RTIs, e.g. at your customers, and transport them to the nearest CC Depot and register them on your balance.
- 2 This service is often combined with CC Transfer Service.** With CC Transfer Service your number of contracted RTIs can be “moved” from one CC Depot to another (where in the world you need them) via our online logistic system, CC LogLink.
- 3 We work with the most competitive transport companies** in terms of rates and collection frequency. Our one condition is that only the appointed collection partner is allowed to collect RTIs at the customer location.
- 4 You pay a modest fee per RTI collected.** The collection fee is individual per customer location, and will be invoiced per RTI collected according to individual customer prices.
- 5 CC Delivery Service is an additional service.** You can choose either to collect your RTIs at the CC Depot and transport them to your own location or to let us deliver your balance of RTIs. You pay a fee per RTI delivered, according to individual customer prices.
